Our attention has been called to the potential interest in and importance of the actual publication date of the original Russian edition of Biokhimiya, notably with regard to U.S. Patent matters. This information is not readily or routinely available. However, we can and hereafter will undertake to supply in each issue of our translation the date known in Russian as "podpisano k pechati." This is the approximate equivalent of "approved for printing," and may be from a day or two to possibly a month before the date of physical delivery of a printed and bound copy of the original Russian issue into the hands of the public. Anyone concerned with the exact date of publication may be sure that it did not occur prior to this date, and may assume that publication took place reasonably soon thereafter.

The "podpisano k pechati" date of each issue will appear immediately following the Table of Contents in the form shown below.
